You do not actually play as Ash, but many other characters from the show are here and the Pokmon also look more like they do on the show.. In all the decision to make this game about Pikachu and his relationship with you as a trainer does make it seem different from the other Pokmon games even though the story, in all honesty, is not completely different.

You can look forward to lots of subtle changes as well--hidden mini-games, cameo appearances by characters from the cartoon, new art for the monsters in the Pokedex, and more.. For example, Pikachu is now on your side from the very beginning Also, you can now print out your Pokedex data using the Game Boy Printer.. Pokemon Yellow isnt actually a sequel to the Red and Blue versions, though--but its got a lot of new stuff that no true Pokemon fan will want to miss.. You can talk to him and actually develop a relationship with him This adds a lot to the game and really does make Pikachu feel like he is your buddy.. There is even a Pikachu surfing mini-game which is way more fun than you would think.

Having different Pokmon also have color really helps make them look more like the way they do on the TV show.. I must admit that I feel Yellow is the better game from the original wave of Pokmon games.. This does not look a million times better than the original Pokmon games, but the fact that the color palettes work very well, it really does showcase the Game Boy Color in a very good way.. Unlike the other Pokmon games, this one does not give you the choice of a starter Pokmon, you have to start with Pikachu.. It was first released in Japan in 1998 and not only managed to capitalize on the fact that the first two Pokmon games had taken over the world.

It capitalized on the fact that people had fallen in love with Pikachu and the Pokmon TV series.. Granted they have not changed a ton of stuff here, but I feel the changes that they have made do actually make the game have way more personality.. If you are a fan of the Pokmon TV show, you will really appreciate what they have done here. e10c415e6f
